# SOUND & SPACE

**SOUND & SPACE (3 Credits)**  
Media Studies Graduate Program  
L1204 Wednesdays 6-7:50 p.m

Sound is not something merely projected into a space. Space is not merely sounds container. To the contrary, sound has the potential to define space, to create metaphorical walls. Sound happens in space; its waves traverse a distance from source to ear. Furthermore, both sound and space have a structural design, an architectonics.

This seminar addresses the sonic qualities of space, the spatial properties of sound, and the myriad other links between space and sound.

This course fulfills one of the theory electives in the Media Studies Program  
Contact the Department of Architecture, Interior Design, and Lighting for course syllabi  
Team taught by Shannon Mattern and Barry Salmon
